

Greetings,

North Dakota State College of Science (NDSCS) celebrated their **100th Electrical Technology Anniversary** on May 12-13, 2023. Recognized and celebrated at this milestone, were alumni from the electrical program, retired and current faculty/staff, and those from programs housed in Barnard Hall. Socials, dinner, entertainment, campus tours, family friendly activities, and the opportunity to attend graduation all took place. 250 attendees joined in the festivities.

It is hard to believe that in 1923 the Electrical Trades program began with 22 students enrolled. Today the program is the only two-year A.A.S. Electrical Technology program in the state and one of the oldest in the nation. Students continue to bring energy and vitality to the department and the demand for electricity and our dependency continues to grow.

An **Electrical 100 Year Technology Endowment** has been started to continue to support the students and program's growth. \$20,000 has been earmarked to start the Endowment and our goal is to make it a \$100,000 Endowment. To learn more, please contact the Foundation office at: 701-671-2247.

We extend a special thank you for attending in person or thinking of us during this event. We are honored for the support and participation in helping make this event a success. You may view several photos of the event at: <https://www.flickr.com/photos/161226064@N05/albums>

Sincerely,

A handwritten signature in cursive script that reads 'Kim Nelson'.

Kim Nelson
Executive Director
NDSCS Alumni/Foundation

P.S. You are welcome to celebrate, and join NDSCS for Homecoming October 6 & 7, 2023. For additional information go to: <https://www.ndscsalumni.com/events/homecoming>
